

Career English Internship

Stay one step ahead in the international career market by combining a PLI language program with a professional internship placement. It's a winning combination that will provide you with a competitive edge for your future. There are many advantages to our Career English Internship program:

- Gain international experience
- Learn technical English vocabulary
- Develop industry contacts and networks
- Learn about North American business culture
- Receive a letter of recommendation from your host company

There are two parts to the program: a study portion and an internship placement. Canadian immigration regulations require that the internship placement is no more than 50% of the program length. As well as the CEIP application form, we will ask for a CV and cover letter. We will also pre-test your English level. You must have a minimum level of Higher Intermediate by the time of placement. Please note that a Study or Co-op Work Permit may be required for this program.

Although we cannot guarantee placement in a specific company, we will place you in a position which is relevant to you and matches your experience and/or studies.
